

PRODUCT FOCUS

Ingrid West Machinery Ltd

January, 1999

Welcome to the first up to the minute news from IWM. Each issue will take a detailed look at one of IWM's products. Exciting news! You may not know that IWM have recently been appointed sole UK agents for Wey Hwang coil winding machines. This is the first totally new range of products to appear in the European market for many years, so it seemed appropriate to start our series with a Wey Hwang machine.

Wey Hwang WH-300 Toroid Winder

WH-300 Features

reduces staff training

- ü Pulls up-to 3 mm wire
- ü Core OD up to 350 mm
- ü All the programmable features ever needed...
- ü Progressive
- ü Segmented
- ü Rotation without wind
- ü Wire load length is programmed in meters (not Shuttle load turns) saving wire wastage and operator time
- ü Segment winding is programmed in degrees around the core making set-ups easier
- ü The machine can store up to 499 core set-up's (depending on complexity) meaning old jobs can be recalled in seconds.
- ü Heavy duty robust machine construction

The WH-300 series machines are specifically designed to cope with large toroids and heavy duty wire.

Available in 7", 10" and 13" head sizes, the machines are robustly built to withstand continual use on your production line.

A state-of-the-art CNC controller allows the user to control all winding parameters for consistent quality of product.

Single button operation

The most impressive benefit of the WH300 machine is the competitive price. Interested.... call Roland West on (01684) 299930

Need a sample.....

We offer an efficient core sampling service. Should you come across a job that you can't do, call us and we can advise you on the best machine to solve your problems. If we have the right machine for the job, we can then give you winding time and offer a demonstration of the machine to get your production started.

How to reach us.....

Should you need any help with machine choice or require a demonstration please contact us by any of the following methods :

Post: IWM Ltd
