Wey Hwang Lead The Way With New Controller

Wey Hwang's continual development program to bring cutting edge technologies to the coil winding industry has lead to the launch of a new

The new controller, similar in layout to the old design allows easy integration and migration for existing users with the following additional **FEATURES AND BENEFITS:-**

- ü **Now fully CE compliant**-TUV No- AE 9955093 01
- ü **Start point**- no longer trial and error to set this value, simply use the two control buttons to physically move the spread head to the correct position.
- ü **Measurement units** - now you have the choice of imperial or metric
- ü **Password feature** - allows the setting of a password requirement for any change to machine settings
- ü **Factory-direct** pricing.
- ü **Layering tap function**- If at wire pitch spacing a winding ends in the middle of the bobbin chamber, It is bad practice and mechanically unsound to simply take the tail off to one side. Previously calculation of new start point, width and turns to wind too ensure the winding finishes at the edge. Now using this function the machine automatically ignores the second start point and continues from the previous step in the same chamber width etc. improving winding quality and production time whilst also eliminating hours of fine tuning.

IWM move location

Due to increased demand, IWM have moved to larger premises. We now have a wide range in stock, (18 at time of going to press). Improving not only our delivery time but allowing immediate demonstrations. see new contact details below:-

How to reach us

Should you need any help, further information. or require a demonstration, please contact us by any of the following methods:

FOUR SPINDLE MACHINE "A PROVEN WINNER"

The four spindle bobbin winder (model WH-764) has again and again proved to be a best seller, with many customers overwhelmed at the quality of production, high speed (6000) Rpm and outstanding value.

**UNBEATABLE
PRICE**

IWM and Wey Hwang are really Showing off

IWM are committed to supporting Wey Hwang in Europe and across the UK. To this end we will be exhibiting at two out of the three coil winding shows world wide.

You can see us at the following exhibitions;

VENUE: The National Exhibition Centre,
Birmingham, UK

DATE: 3-5th October 2000

WHY? Coil Winding 2000 is Europe's longest established bi-annual Exhibition and Conference dedicated to the wound components industry. Launched over 20 years ago, Coil Winding is the European forum for coil winding technology attracting a high-quality audience of key specifiers and buyers from all over the world.

on stand B16***

ENCLOSED:

With this issue you will find closed two diary reminders, they are simple stickers to place in your diary so you won't miss out on an important event. Be sure to use them, if you require any more please do not hesitate to contact us as we will be happy to oblige.

Coil Winding, Insulation & Electrical Manufacturing International Conference and Exhibition

C W I E M E 2 0 0 0

June 27 - 28 - 29, 2000 - Berlin, Germany

VENUE: *The Messe Berlin fairgrounds Hall 20, Berlin, Germany*

DATE: June 27 - 28 - 29, 2000

WHY? Coil Winding, Insulation & Electrical Manufacturing International Conference and Exhibition - C W I E M E 2 0 0 0. See the greatest number of coil winding, insulation and electrical manufacturing companies and products under one roof, at the biggest, dedicated event in Europe

WHERE!!!

***Come and see us on
stand 406 and 408***

Need a sample?

IWM offer an excellent core sampling service. From the bare core specification, we select best equipment to use, wind some samples and return them to you together with example production times, quotation etc. we can then demonstrate the machine to get your production started at your premises at your convenience.

All this is available to you absolutely free
