

E-900 SERVOTECH WINDING MACHINE

MEDIUM-SIZED BENCH WINDING MACHINE

Equipped with: -

- Face plate.
- Guider system
- Safety shielded foot pedal.
- CNC motion controller and simple electronic programming.
- Tailstock - with security lock.
- Traverse head
- Sturdy base - constructed from welded steel for strength and durability.

State-of-the-art winding machine. The E-900 is a floor standing style winding machine, medium sized to be easily placed in a factory or workshop, equipped with head and bench in galvanised steel and covered in stainless steel, fixation plate, tailstock with security closure, guider system protection and pedal. With highly advanced features, including, energy efficient servo motors, and intelligent torque boosting technology.

The applications of this machine include the manufacture of solenoids, inductors, and transformers, with capacity to make multiple windings and even distribution and power transformers from 10 to 600 KVA.

The wide range of velocities, up to 400 r.p.m, permits primary and secondary windings on the same machine, thus reducing the production processes.

The concept and design facilitates the placement of necessary accessories such as end-fillers, insulation paper or foil, of various types.
