

Multi wire and tape Feeder Head

- Used for producing multi-winding transformers at one workstation
- Allows use of up to 4 different wire sizes without rethreading
- Felt pads for cleaning of wire and back tension
- Includes margin tape and cover tape attachment

Guide tube feeder head

- Ceramic parts at every wire contact point, to protect the wire coating
- Guide tube places wire accurately
- Independent micro-adjustment for more than one spindle.
- Felt pad for cleaning of wire and back tension
- Takes guide tubes of inside diameter 0.3 ~ 1.2 mm

Fixed roller feeder head with micro adjustment

- Durable brass rollers to control heavy gauge wire
- Independent micro-adjustment for more than one spindle.
- Felt pad for cleaning of wire and back tension

Variable angle roller feeder head

- Durable brass rollers to control heavy gauge wire
- Adjustable angle of feed.
- Adjustable roller position enables wire pre-bend / straightening.

We aim to be much more than a machinery supplier. Our team has a vast range of winding experience and is able to offer help and advice on all aspects of coil winding, from tooling design to machine choice and set-up.
