

TAPE WINDER - "AIR JET"

The Air jet is a rapid way to tape small Toroidal cores, giving machine wound repeatability and quality on every product run.

- Cutting length between 20-999 mm
- Tape width from 7mm up to 50 mm

Simple operation process...

Place the core

Hold tape over top of toroid

With the help of "Air Jet", the tape will be pushed through the core, after that, we have to bring the tape over the top of the toroid to produce the wound tape turns...

The finished taped core

We aim to be much more than a machinery supplier. Our team has a vast range of winding experience and is able to offer help and advice on all aspects of coil winding, from tooling design to machine choice and set-up.
