COIL HANDLING / PACKING TRAYS

Damage, rework and scrap currently adds to manufacturing costs, making companies uncompetitive in World markets. Prevention is the key; maintain the conformance of each part by using good work handling practices.

A range of standard containers available for protection of precision components. We can also create customised containers to protect even the most complex shapes and sizes. These are precision moulded to offer smart presentation and protection, especially ideal for transportation of coils. Made from High density EPS, these trays very light (55 grams / Litre) whilst still very strong means they can be used again and again and again...

Features and benefits include:

EXCELLENT PROTECTION:

Prevent accidental impact, Protection from contamination / oil, Thermal properties protect from extreme temperatures. Protection when shipped to and from subcontractors

PRECISION MOULDED:

Smart presentation and good part location

PARTS SEGREGATION:

Reduces transit damage and rework. Up to 250 stock sizes / types available, however this method of tray production results in LOW tooling costs, meaning we can produce new designs to exactly match your product / assembly... Option available for foam lined base for use with PCB / Pin type bobbins.

CONDUCT-A-PAK:

Option for material to be static/electrical compliant

STACKABILITY:

Fitted lids are available to make trays stackable to minimise storage costs

PRODUCT ENHANCEMENT:

Can be made with embossed company logo for clear identification.

Available in range of colours, either to support corporate identity or for product coding
